FOR THE USE ON > CLOTHING AND FOOTWEAR OF TEXTILE  
AND SUEDE, PAPER, PAPERBOARD OR NATURAL WOOD

WATER DROPLET STANDING ON TEXTILE MATERIAL PROTECTED WITH NANOTECHNOLOGY

**FEATURES:** Superhydrophobic (water-repellent), oleophobic (repels oil) with the effect of easy cleaning, invisible to the naked eye, UV stable, chemical resistant up to PH13, steam permeable, resistant to washing and cleaning. Provides excellent protection against various types of stains. It does not change the texture and color of the material.

### BENEFITS:

- Water repellent with lotus effect
- Colourless (optically neutral)
- Less cleaning effort and much better cleanability
- Breathable
- Hygienic cleanliness
- Protects the environment

**LASTING NANO PROTECTION** : 30 machine wash cycles

**CONSUMPTION:** 25-100ml / m<sup>2</sup>, depending on the thickness and material absorbency

# NANOTECHNOLOGY

## HYDROPHOBIC AND OLEOPHOBIC

HYDROPHOBIC (WATER REPELLENT) FURNITURE

### AREAS OF USE:

- Outdoor clothing
- Shoes
- Seat cushions for garden furniture
- Interior furniture
- Tents
- T-shirts
- Variety of untreated wood species
- Wooden tables
- Wooden bars
- Wooden floors

EASY TO APPLY

Spray and wait for 24h

HYDROPHOBIC (WATER REPELLENT) T-SHIRT

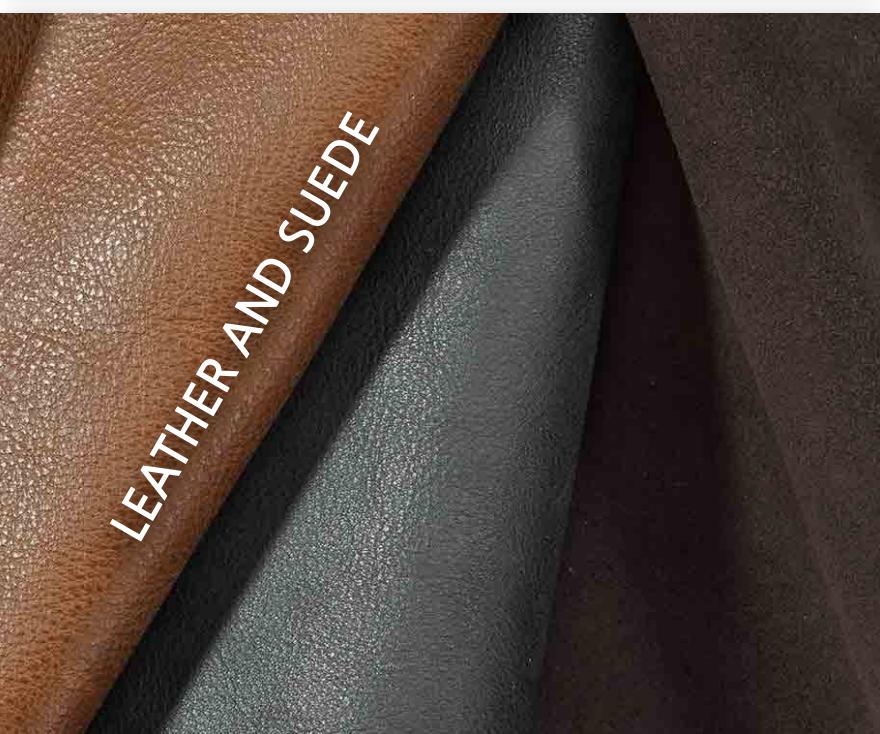

**APPLICATION:** The surfaces to be treated must first be clean and dry. Thus prepared surfaces moistened by spraying or dipping in nano-liquid and leave to dry. Ultra-thin nano layers are fully formed and stable after 24 hours. Only after this time it is possible to test the effects of superhydrophobic effect and easy cleaning effect. If the treated materials were previously washed with detergents, remove any detergent particles by washing the material first. Items protected by product Nano System TNW, when washed in the washing machine, require a smaller amount of detergent than is otherwise normal.
